EDUCATION

University of Naples Federico II (UNINA) 02/2027 – 07/2027
Exchange Student in Computer Science *Naples, Italy*

Federal University of Paraíba (UFPB) 06/2024 – 06/2028 (Expected)
B.Sc. in Computer Science GPA: **8.92/10**
Relevant Coursework: Discrete Mathematics, Linear Algebra, Data Structures and Algorithms, Digital Image Processing, Algorithm Analysis and Design, Concurrent and Distributed Programming

EXPERIENCE

Automation Intern – BTG Pactual 06/2026 – Present
- Led the end-to-end development of an automation solution for a financial reconciliation workflow used by a team in Colombia, reducing manual work and **saving 36 minutes of operational effort per day**.
- Architected and implemented the solution on **AWS**, automating data consolidation and validation across multiple sources while leading requirements gathering and **user acceptance testing (UAT)** through production delivery.

AI Developer Researcher – LOTEP 11/2025 – Present
- Drive data visualization initiatives for a joint venture between ARIA and LOTEP, the government authority regulating gaming operations in Paraíba.
- Developed interactive dashboards and reporting tools with **Python, Pandas, and Dash** to generate strategic insights for executive decision-making.

Summer Intern (IT and Data Analysis) – Office of Federal Deputy Tabata Amaral 06/2025 – 09/2025
- Structured and optimized a **CRM database with 40,000+ contacts** using **Pandas and R**, enabling complex queries and strategic data cross-referencing for public-policy work.

Artificial Intelligence Intern – FilmaEU 02/2025 – 07/2025
- Developed **computer vision** effects for players, balls, and rackets using **OpenCV**, integrated as a key feature in the launch of the company's new app.

Trainee – TRILHA Mentoring Program | UFPB 08/2024 – 12/2024
- Developed a Python mobile app prototype for synchronized reading and music while connecting with students at Harvard, MIT, and Berkeley to refine product concepts and long-term career goals.

PROJECTS & AWARDS

GuardAzul – Hackathon Finalist | Co-founder Developer
- Co-founded and built GuardAzul, a mobile platform using **real-time photo and location validation**, with AI-powered image analysis via **Google Vision** and an intelligent chatbot powered by **Gemini**.

Gestar – NewHack & OpenAI Education Hackathon Project | Co-founder Developer
- Built an AI-driven municipal education platform using the **OpenAI API** to automate school communications, summarize reports, and support a public transparency portal.

Highest Essay Grade in Paraíba State – ENEM: Scored **980/1000**, the highest score in the state that year.

Outstanding Student for Olympic Achievements (2023): Honored by the city government with the "Outstanding Student José Lins do Rêgo" award.

Academic Olympiads – OBA, OBEF & OBG: Gold Medal (2019), Silver Medal (2020), two Bronze Medals (2018, 2020), and Bronze Medal (2023).

SKILLS

Programming & Data: Python, R, Pandas
AI & Computer Vision: OpenCV, OpenAI API, Google Vision, Gemini API
Visualization: Dash
Cloud & DevOps: AWS, CI/CD
